

E-SYSTEM 2000

E-SYSTEM 2000

METHOD OF OPERATION

1. End Load Carton is removed from a supply magazine via vacuum arm
2. Carton is erected at a single station product load station
3. Product is manually loaded horizontally into carton
4. When the dual cycle start button is hit, loaded carton is then transported to the closing position for tuck or glue closure
5. Completed carton is then automatically discharged from the machine to a convenient working height

SPECIFICATIONS

Features

- Optional Automatic Loading
- Compact Footprint
- Intermittent Motion
- Glue or Tuck
- PLC Controls

Packing Materials

- Paperboard
- Corrugate

Speed

- Up to 25 Cartons per minute

Size Range

- Min: 1" x 3/4" x 4"
- Max: 12" x 4" x 12"

*Can be ordered outside the standard size range

Voltage & Controls

- 220 Volts 50/60 Hz, Single Phase

Air Consumption

- 80 PSI (6.6 bar) Volume Consumption approximately 15.8 SCFM

Shipping

- Less than 1300 lbs (590 kg)

*All Engineering Specifications and Designs are subject to change based on individual requirements
