

# TWINSEAL BEVERAGE CARTONER

# TWINSEAL BEVERAGE CARTONER

## METHOD OF OPERATION

1. Operator opens and places the carton in the holder at the front of the infeed plow rails with part of the back side of the carton closed
2. Operator transfers the correct number of cans from the loading table into the opening of the carton
3. Carton is then pushed forward and the remaining flaps of the box are folded except the outer flap
4. Glue is automatically applied to the underside of the outer flaps and elevated into the squaring and compression section
5. The glue is cooled, and the carton is compressed and automatically discharged out of the machine to a convenient working height

## SPECIFICATIONS

### Features

- ECONOSEAL glue system
- Standard, sleek, and slim-style cans
- Economy & Full Flap Cartons
- Variety Packs
- Automatic Carton Sealer

### Packing Materials

- Paperboard
- Corrugate

### Speed

- Up to 15 Cartons per minute

### Size Range

- Min: 3" x 3" x 5"
- Max: 12" x 6 1/4" x 12"

\*Can be ordered outside the standard size range

### Voltage & Controls

- 220 Volts 50/60 Hz, Single Phase

### Air Consumption

- 80 PSI (5.5 bar)

### Shipping

- Less than 500 lbs

\*All Engineering Specifications and Designs are subject to change based on individual requirements
